

# NYLOCKING RINGS

◆ First time in India available in various sizes a large quantities

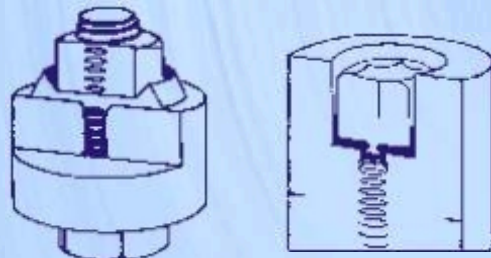

## Advantages

- ▶ Nylock Rings are much cheaper in cost than the Nylocking nuts
- ▶ Nylock Rings flow into the threads of bolt and nut resulting in effective multiple locking and sealing.
- ▶ Nylock Rings prevent rotation of the retaining ring around the bolt & prevents the nut from loosening as they wrap round the flats on the nut.
- ▶ Nylock Rings create effective frictional resistance with the bolt.
- ▶ Nylock Rings fill all free spaces and seal against air all other leakages.
- ▶ Nylock Rings absorb vibrations arising in any bolt assembly which reduces the sound pollution.
- ▶ Nylock Rings have Plastic flexible characteristics
- ▶ Nylock Rings neither deteriorate nor wear and therefore, can always be reused again & again.
- ▶ Nylock Rings are chemically resistant to Alkalies, solutions of neutral inorganic salts, fats, oils, petrol, Benzine, Alcohol, Acetone, diluted acids and sea water.
- ▶ Nylock Rings prevent electrolytic corrosion between two different metal surfaces.
- ▶ Nylock Rings prevent fatigue in the bolt material
- ▶ Nylock Rings do perfect insulation & protect the surface of the material.
- ▶ Nylock Rings are made from NYLON 6 material but however on special request Nylock Rings can be made from NYLON 6-6 also.
